FIGURE 2. LOCATION OF MOSCOW HERRINGBONE SAM SITE E-29.

PIC/JB-1010/60

REFERENCE POINT:

The Kremlin, 55°45'N 37°37'E.

LOCATION:

46 nm west-northwest of reference point, just north of Denkovo.

FUNCTION:

One of a group of sites deployed for the defense of Moscow.

SITE STATUS:

Probably complete and operational.

REMARKS:

This is the first known photography from which the geographical coordinates of Herringbone SAM Site E-29 can be accurately determined.

The site is regularly shaped and is located in a partially cleared area on the outer herringbone defense ring. Visible service roads indicate that the site probably has 60 launch points. A YO-YO radar site is present, and a probable housing facility is located a short distance northeast of the herringbone site.
